EDUCATION

B.Tech in Data Science
MVSR Engineering College, Hyderabad
Expected Graduation: 2028

TRR College of Technology: Diploma in Computer Science
2023 – 2025 | GPA: 9.8/10

Z P High School, Pochampally, Yadadri: Secondary School Certificate – Board of Secondary Education
2022 – 2023 | GPA: 9.7/10 | Achieved 97%, excelling in Mathematics and Science.

PROJECTS

Intelli Credit AI – Loan Risk Analysis System

- Developed an AI-powered system to analyze corporate loan applications and assess financial risk.
- Built backend APIs using FastAPI for handling financial data and document processing.
- Implemented ML-based risk scoring using financial metrics such as revenue, profit, debt, and assets.
- Integrated PDF processing and OCR for extracting data from financial documents.
- Designed a structured risk report generator for decision-making support.
- Deployed application on Render for real-time access

GitHub: github.com/ashwini2134
Live Demo: https://intelli-credit-ai-2.onrender.com/

Human Scream Detection System for Crime Prevention

Designed and implemented a real-time audio classification system to detect human screams and aid crime prevention in public spaces.

- Utilized Librosa for audio data preprocessing and TensorFlow for training a deep learning model
- Extracted MFCC features for classification accuracy.
- Created alert triggers upon distress detection, contributing to public safety and smart surveillance.

Smart SOS Safety System

- NODE 1 – SOS Device
- User triggers SOS → Camera records → CNN runs locally (offline) → Video converted to event-text → Sent to ESP32 → Alert sent via LoRa.
- NODE 2 – Cuboid Unit
- Receives SOS → Buzzer ON → Detects nearby person using PIR & Ultrasonic (offline) → Displays SOS location → Forwards alert to police using LoRa Mesh.
- NODE 3 – Police Control Room
  Receives alert → Displays event → Logs time, source & event type.

KEY SKILLS

- Programming Languages: Python, Java, C++
- Web Development: HTML, CSS, JavaScript
- Database Management: MySQL, SQL
- Automation & AI Tools: Python Automation, Web Automation (Selenium – basic), n8n (Workflow Automation), Botpress (AI Chatbot Development)
- Tools: Git, GitHub, Visual Studio Code
- Operating Systems: Windows, Linux
- **Soft Skills:**Leadership, Public Speaking, Communication
